TRADITIONAL SAUNA

Heat in its original form

2 VERSIONS
available

CONTEMPORARY
Design

THERMALLY TREATED
wood

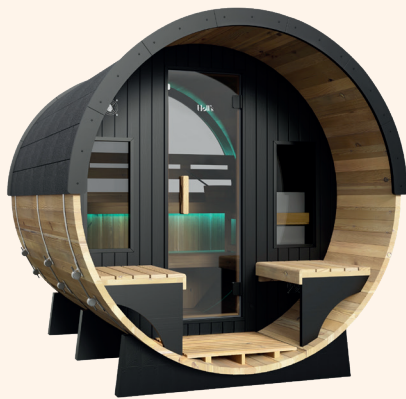

HALF-MOON
rear window

The Barrel tradition, reinvented for well-being.

Designed as a true cocoon of relaxation, this sauna combines natural elegance with thermal performance. Made from thermally treated Canadian spruce, it stands out with its soft lines and rounded shape, designed to promote optimal hot air circulation and even heat distribution. Its double bench with side return offers generous comfort, ideal for extended moments of relaxation.

This sauna is available in two versions: the Lounge model, with its integrated outdoor terrace to extend your relaxation time, and the Classic model, with a clean design and no terrace.

The included Vulkano stove, featuring a double wall, improves safety by reducing the risk of contact with hot surfaces while providing a softer, more enveloping heat for enhanced well-being.

Orphée Lounge

HL-ORPH240L-PK

5 to 6 seated places

L 205 x D 240 x H 215 cm

Electric heater
