

BIG FOOT

Anti-vibration mounts for heat pump

- Optimal absorption of vibrations
- Allows to do without a concrete slab
- Supports up to 450 kg per support

FOR HEAT PUMP
up to **900kg**

COMPATIBLE WITH ANY
POOLEX HEAT PUMP

Pack of
2

REMOVE VIBRATIONS

**LESS VIBRATIONS
LESS NOISE**

**FACILITATES HEAT PUMP
INSTALLATION**

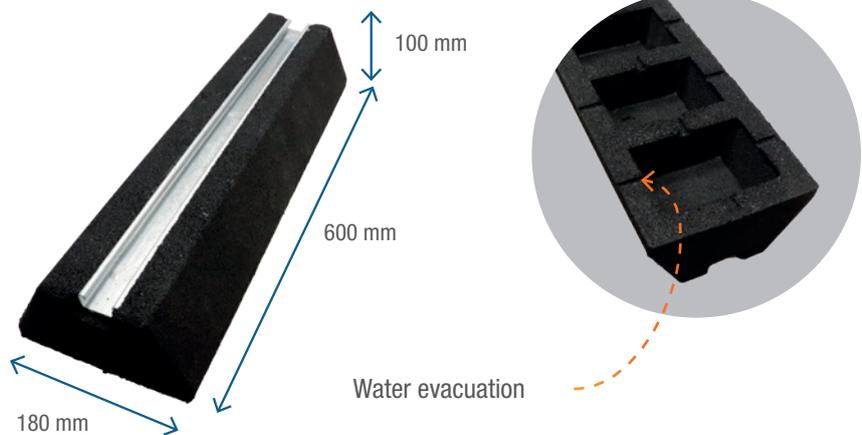

**SUPPORTS UP TO
450 KG PER SUPPORT**

BIG FOOT

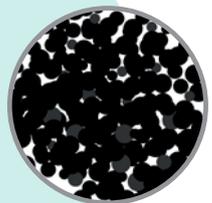

ANTI-VIBRATION SUPPORTS FOR HEAT PUMP

Incorporating an aluminum strip to fix the heat pump, the Poolex Big Foot are compatible with all of our heat pumps and are made from recycled tires.

The mounting brackets must be installed on level ground, on a bed of sand or gravel and they eliminate the need for a concrete slab. Their elasticity allows optimal absorption of the heat pump's vibrations and reduce noise.

Big Foot Poolex are made from recycled tires. The hot manufacturing process provides ideal elasticity and a very long service life.

TECHNICAL DATA

Dimensions	600 x 180 x 100 mm
Reference	PC-FEET60
Compatibility	The entire Poolex range (excluding Megaline Fi 75 and 100)
Weight	10.8 kg
Material	Recycled tire
Supported weight	900 kg
